

ZaiMem MCP Server

Full-stack security assessment of the ZaiMem persistent-memory MCP server: authentication and credential storage, the JSON-RPC tool surface, dependency supply chain, transport hardening and abuse resistance. Fourteen findings were identified and triaged; both critical issues were fixed in build 4c00866.

Prepared for ZaiMem Maintainers

Audit window September 14, 2026

Hardening delivered v1.7.2 · commit 4c00866
